

Race to 20

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

Each player has their own board.

Player 1 rolls 1 die.

Count out that many counters into a pile, and then add them to the board saying the numbers out loud.

Then it is player 2's turn.

The first person to cover all of their squares is the winner.
